PROJECTS

03/2021 –05/2022

SHIVAM CAR SERVIC, final year project, [GitHub](#) link

- A web-based service platform, Shivam car service lets users view services and schedule appointments according to their convenience
- This application consists of four modules: administrator, manager, mechanic, and customer.
- It was my responsibility to lead a team. My responsibilities included managing backend operations.
- Language Used: PHP 7.4.0
- Backend: MySQL 8.0

12/2021

Infinite scrolling project with API, [GitHub](#)

- Infinite scrolling is a web-design technique that loads content continuously as the user scrolls down the page
- It also provides a great learning experience on how to develop an API that can return database content into the front end.
- Language Used: PHP 7.4.0, Ajax, JSON API
- Backend: MySQL 8.0

08/2022

crm (Customer Relationship Manager), tkinter module, [GitHub](#)

- Build a crm (Customer Relationship Manager) database tool with Python for Tkinter.
- Through this project, I learn how tkinter can be used for making GUI applications
- Language and module: Python, tkinter

CERTIFICATES/ ACHIEVEMENT

- **SQL(Basic), Hackerrank** : It includes simple queries, relationships, and aggregators.
- Gold badge for python on HackerRank
- Gold badge for SQL on HackerRank

LANGUAGES

- English
- Hindi
- Gujrati(native)
